

Improve Security on Hazmat Shipments

ShipMatrix® enables you to improve security through the comprehensive tracking of shipments from the time they leave your loading dock until it arrive at the consignee's door.

Due to heightened security concerns, even greater scrutiny is being placed on hazardous material shipment accountability. To reduce vulnerabilities, the shipper, carrier and consignee must establish effective means of communication to ensure proper personnel are on staff to safely receive and handle these sensitive shipments and to prevent dangerous materials from falling into the wrong hands.

ShipMatrix offers user-friendly software that automates the process of tracking shipments across the entire distribution channel. Developed by transportation experts, *ShipMatrix* shipment visibility solutions are designed to ease many of the challenges facing your company, including reducing supply chain vulnerabilities, managing shipping costs, and maintaining strong customer and carrier relationships.

Regardless of your business size, *ShipMatrix* solutions will create significant value by providing you with the ability to communicate package contents, monitor shipment status, maintain historical shipping data of Hazmat shipments, and measure carrier performance, all of which play a key role in your ability to improve product accountability.

REDUCE ANNUAL SHIPPING COSTS:

ShipMatrix's innovative shipment tracking and reporting functionality enables you to monitor on-time performance, lost packages, and exceptions and provides you with the tools to take action, such as filing for guaranteed service refunds, processing claims for lost or damaged packages, and sending package delivery status notifications.

In addition, *ShipMatrix Invoice Reader* is a sophisticated software application that simplifies the process of reading and auditing electronic invoices, helping shippers further reduce annual shipping costs.

ShipMatrix solutions offer many value added features, including:

- ✓ Compatibility with UPS, FedEx, DHL/Airborne, and USPS shipping data
- ✓ Single or multiple site capabilities
- ✓ Multi-carrier capacity
- ✓ Compatibility with virtually any shipping system

Best of all, *ShipMatrix*'s short implementation time enables you to address your shipment visibility needs today. And with a low cost of ownership and rapid return on investment, no shipping department should go without it.

Strengthen Security • Reduce Liability • Improve Communications
